

MDO Management Company is a UCITS management company and an Alternative Investment Fund Manager with offices in Luxembourg and Dublin. MDO Management Company services over 70 clients from around the globe and acts as management company for over 50 investment vehicles with assets under management exceeding EUR 28 billion.

In this context of growth, MDO Management Company is currently recruiting a:

Database Specialist / Business Analyst
Risk Management Applications Team

Job Purpose: The Risk Management Applications team is a specialised unit within the IT department, integrated under the Operations of the Company. The Risk Management Application unit is responsible for the production processes for data integration, risk analytics, risk reports and associated business changes. The unit ensures the delivery of quality management information to clients and to other teams within the company.

Your main duties and responsibilities

- Developing and maintaining the company-wide database, technical tasks of database administration and .NET coding, which include:
 - Database design and implementation;
 - Import of data feeds from central administrators, data providers and other external and internal sources;
 - Export of data for feeding systems used by other teams;
 - Data quality monitoring.

- Developing and maintaining risk applications and risk processes including:
 - Calculation of risk measures, performance statistics and other financial indicators;
 - Assisting in risk applications design and implementation;
 - Developing and maintaining risk reporting.

- Provide business analysis for the Risk Management Applications team
 - Coordinating the implementation of new or enhanced risk management software solutions with business users in order to ensure project completion on time, in budget and in scope;
 - Implementing procedures and new methodologies;
 - Preparing business requirement documentation for new developments whilst ensuring that developments are in line with company IT policies;

- Day-to-day activities:
 - Ensuring the successful functioning of all data feeds;
 - Guarantee the proper data feeding of all other systems;
 - Resolution of any issues related to data quality;

- Process all mappings required by the database;
- Verification of the correct computation of all risk analytics;
- Ensuring the smooth generation and distribution of all reports.

Technical environment

- Microsoft SQL Server
- SSIS
- SSRS
- C#.Net

Your profile

- You have a strong knowledge of SQL database management, ideally acquired in a similar risk management team
- You have a good knowledge of Luxembourg UCITS market and regulations;
- You have at least 2 years of relevant professional experience within the Luxembourg Fund Industry, an experience in risk management function would be a strong asset;
- You hold a University degree in Economics, Engineering, Business Administration or in a similar field from a recognised business school or university;
- You are a structured thinker with the ability to work independently and can multi-task;
- You like to work in a very dynamic and multicultural environment and have good interpersonal skills;
- You are fluent in English, any other mainstream language would be a real asset.

Our offer

Within a growing company, we offer competitive remuneration and training adapted to your needs throughout your career. Working at MDO means joining a friendly, dynamic and multicultural team of 60 people, within a flexible working schedule environment where work/life balance counts.

Interested? This is your chance to apply now! Please send us your application, which will be treated with the strictest confidentiality.
